EXPERIENCE

SENIOR IT PROJECT MANAGER

07/2015– Present

Telstra Corporation | Docklands VIC | website

Perform roles of Scrum Master, Delivery Lead, Agile Coach, and Servant Leader across cross-functional teams in 'customer first' eCommerce development and implementation projects, ongoing digital marketplace management, and web and mobile apps development by way of:

- Managed and monitored the timely preparation of project plans and conducted overall management of the onshore and offshore project teams.
- Managed resource planning for each release and the release activities in the project and organised test management activities during the release test phase.
- Managed and monitored customer requirements related to change, problem and incident management activities according to ITIL V3.
- Liaising with key stakeholders to guide them through solution design and feature development.
- Building product backlogs (managing with Trello) and setting and prioritising sprint goals.
- Leading UX and Development teams to drive usability testing, prototyping and new feature design.
- Coordinating testing teams to build test cases and provide interpretation of requirements/user cases.
- Organising in-sprint testing during UAT phase including monitoring execution, issues/defects and working with stakeholders to prioritise and communicate the same to delivery teams.

Key achievements:

- Spearheaded SharePoint site structure development in 2016 for the Telecommunication Project Delivery Group improving indexing and search abilities.
- Implemented centralised Enterprise Project Management system improving portfolio governance, scheduling, forecasting, and reporting.

IT PROJECT MANAGER/SCRUM MASTER

01/2014 – 06/2015

HIA Insurance Pty Ltd | Melbourne VIC 3000 | website

Performed roles of Scrum Master, Delivery Lead, Agile Coach, and Servant Leader across cross-functional teams in 'customer first' eCommerce development and implementation projects, ongoing digital marketplace management, and web and mobile apps development by way of:

- Conducted analysis of IT systems, provided estimates for the modification of relevant IT systems, identified dependencies between interfaces, preparation and verification of launch scenarios (including data migration) and documentation of the achieved results.
- Actively identifying, coordinating, and documenting requirements, user stories, and acceptance criteria.
- Liaising with key stakeholders to guide them through solution design and feature development.
- Organised and moderated meetings and know-how transfer workshops with the customer on the IT- and business-side.
- Building product backlogs (managing with Trello) and setting and prioritising sprint goals.
- Leading UX and Development teams to drive usability testing, prototyping and new feature design.
- Organising in-sprint testing during UAT phase including monitoring execution, issues/defects and working with stakeholders to prioritise and communicate the same to delivery teams.

Key achievements:

- Spearheaded SharePoint site structure development in 2016 for the Telecommunication Project Delivery Group improving indexing and search abilities.
- Implemented centralised Enterprise Project Management system improving portfolio governance, scheduling, forecasting, and reporting.
