EDUCATION

Master of Nursing Science | La Trobe University | Melbourne VIC 2014 - 2016
Bachelor of Nursing | Monash University | Melbourne VIC 2006 - 2009

EXPERIENCE SUMMARY

Registered Nurse | ABC Nursing Agency | Melbourne VIC 05/2018 – Present
Registered Nurse – Shift Coordinator | St Vincent's Hospital | Melbourne VIC 03/2011 – 04/2018
Registered Nurse | The Royal Melbourne Hospital | Melbourne VIC 11/2009 – 02/2011

EXPERIENCE

Registered Nurse (RN) | ABC Nursing Agency Pty Ltd | Melbourne VIC 05/2018 – Present

Work across a number of public and private healthcare settings including The Royal Melbourne Hospital, St Vincent's Hospital, Alfred Health, Austin Health, and Box Hill Hospital.

- Providing person-centre nursing care to patients from all demographics aligned to each hospital's guidelines and procedures.
- Working across all areas of healthcare including emergency, ICU, medical, surgical, paediatrics, oncology, cardiology, urology, mental health, and rehabilitation.
- Performing patient admissions/discharges/transfers completing all relevant documentation.

Registered Nurse (RN) – Shift Coordinator | St Vincent's Hospital | Melbourne VIC 03/2011 – 04/2018

Core Activities – Shift Coordinator:

- Direct clinical and non-clinical staff and coordinating shifts (under the direction of NUM, HOOT, SRN and Capacity & Access Manager).
- Assess staff requirements on shift-to-shift basis and request staff through central staffing and allocations of staff depending on acuity of patients and relevant staff skills.

- Educate, guide/support and demonstrate skills relevant to the speciality to new/agency staff, new graduates and students.
- Provide iSoBAR handover to medical team when handing over patients in different situations such as shift change and discharge destination.

Core Activities – Registered Nurse:

- Provided person-centred, evidence-based nursing care as an RN and also leveraged advanced knowledge and skills in activities including:
 - Orientating new medical staff and familiarising them with ward-specific policies and practices;
 - Providing education and support in cases of deviation from safe practices or policy and guidelines;
 - Completing risk assessments of patients at risk from psychological or behavioural disturbance and/or high physical acuity and care needs;
 - Acting as PIVD nurse (specialising in venepuncture/peripheral intravascular device insertion);
 - Being preceptor to students and TPPP participants (supporting goal setting and completing performance reviews); and
 - Acting as competency assessor for new and less experienced nurses.

Registered Nurse (RN) | The Royal Melbourne Hospital | Melbourne VIC

11/2009 – 02/2011

Worked across multiple areas of the hospital as part of a Graduate Nurse Program including:

- Accident & Emergency (A & E):
 - Provided immediate and urgent care management for various trauma patients (from infants to elderly) including basic life support as required (CPR and auto defibrillator), responding quickly and accurately to life threatening situations.
- Respiratory & Cardiology:
 - Provided person-centred nursing care and support for patients who had undergone major cardio thoracic surgery including clinical pathway assessing and responding to deviations, care and removal of chest drains, changing sternal vacuum dressings, care and assessment of surgical wounds, patient education.
- Orthopaedics/Surgical/Gastroenterology:
 - Managed post-operative patients (including regular monitoring of vital signs, neurovascular observations, and pain management; performing wound assessments (including removal of drain tubes and sutures).
- Oncology/Neurology:
 - Caring for the neutropenic patient, following precautions as per hospital protocol including preparing and administering morphine, heparin infusions and transfusions of blood products.
- Haematology & Renal:
 - Administered multiple IVs through PICC, CVC and PVC lines- monitoring patients for febrile neutropenia and other complications-careful documentation of fluid balance charts.
- Paediatrics:
 - Provided person-centred nursing care to paediatric patients including children with chronic conditions, monitored and responded to adverse medication reactions, and informed parents/carers of ongoing medical care/treatment following discharge.
